(54) ACTUATOR FOR MOUSSE-INJECTING CONTAINER

(57)Abstract:

PURPOSE: To automatically inject a mousse without touching a container by hand by holding the container by a holder when the mousse which is used for the sterilization, decontamination and cleaning of hand is infected.

CONSTITUTION: A container C with an injection button B is held by a holder 14. The holder 14 is rotated by a rotating means 13 between a normal standing attitude wherein the injection button B of the container C being held by the holder 14 faces upward, and an upside-down attitude wherein the injection button B faces downward. The injection button B of the container is depressed by a pressing means 15 so that a mousse may be injected from the container C under an upside-down attitude being held by the holder 14.
